

A Modern Alternative to an 8 Ball
Competition

Introduction

- These slides are designed for a competition involving 64 players
- It is made up of 8 sections with 8 players per section in the round robin phase
- The top four players per section go into the knock out Championship round
- The bottom four players per section go into the knock out Plate round
- The actual number of players who turned up is 56
- This introduces an additional problem which is resolved by the inclusion of each section having a bye
- Use of the variance 'bye' formula, allows for late entries, thus maximising participation and subsequent additional entry fees for the club hosting the event
- The whole process is fully automated with the resulting players being allocated to their respective knock out rounds within seconds of the sectional round robin series being completed , hence speeding up the process dramatically
- All competitors and spectators are informed via tv monitors situated around the event premises in REAL time, allowing for interactivity
- The 'order of play' slide informs each player as to their place, allowing every player adequate time to prepare, resulting in the reduction of wasted time
- Order of Play is: Rnd 1 [1x8,2v7,3v6,4v5] - Rnd 2 [1v7,8v6,2v5,3v4] - Rnd 3 [1v6,7v5,8v4,2v3] - Rnd 4 [1v5,6v4,7v3,8v2]
Rnd 5 [1v4,5v3,6v2,7v8] - Rnd 6 [1v3,4v2,5v8,6v7] - Rnd 7 [1v2,3v8,4v7,5v6]
- A completed game in the sectional play [see Order of Play – Progress slide] is highlighted in red/white e.g. 3-1
[Best of 5]
- Each slide can be changed automatically between 5-60 seconds, thus giving interactivity for both players and spectators
- This system augments the hosting clubs ability to not only offer an interactive alternative, but also acts as both a back up and cross reference check for current 8 ball event applications currently in use in New Zealand
- Adaption to use in REAL time via the internet [TCP/IP] can also be applied
- We also have an alternative module based on 6 players per section

Players Schedule - 64 users
